

**Tralse Informationalism Treatise:  
I■Cells, Proto■I■Cells, Myrion Fields, and  
Informational Tensor Theory**

# 1. Introduction

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto■■cells form the substrate of physical microstates, lacking boundaries or generative models. ■■cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new ■■cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 2. Informational Monism

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto■■cells form the substrate of physical microstates, lacking boundaries or generative models. ■■cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new ■■cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 3. Proto■■Cells

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto■■cells form the substrate of physical microstates, lacking boundaries or generative models. ■■cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new ■■cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 4. ■■Cells

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto■■cells form the substrate of physical microstates, lacking boundaries or generative models. ■■cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new ■■cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## **5. Awareness**

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## **6. Myrion**

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## **7. CCC and GM**

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## **8. Tensors**

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this

document expands on these core principles.

## 9. Autism

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 10. Psi

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 11. Physicality

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new *i*cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 12. Corrected Insight

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto*i*cells form the substrate of physical microstates, lacking boundaries or generative models. *I*cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of

new  $i\Box$ cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.

## 13. Tralse Universe

This section elaborates the theory in depth. Tralse Informationalism asserts that all reality reduces to information, but consciousness is a distinct category of information—nonphysical, awareness-bearing, and capable of shaping structural-information (matter-energy). Proto $\Box\Box$ cells form the substrate of physical microstates, lacking boundaries or generative models.  $I\Box$ cells, by contrast, contain boundary tensors, predictive generative tensors, and resonance tensors, granting minimal consciousness. Awareness flows through Myrion fields, creating psi-like resonance effects that cannot be directly observed, only inferred. CCC acts as the crown function of the Grand Mind (GM), delegating creation of new  $i\Box$ cells. This framework unifies monotheistic and pantheistic models. Each section in this document expands on these core principles.
